Discover your Happy Place

There are thousands of happy places near you that are waiting to be discovered. We want **you** to join the happy place movement today by discovering and sharing happy places in your community that help you and others to feel good.

Happy Place is the world's first Asset Based Community Development app that empowers citizens to map places in their local area that promote health and wellbeing. By doing so, we will establish a comprehensive map of local places that promote and protect wellbeing.

Features of the Happy Place App.

Record Happy Places

Categorise happy places according to the 'Five Ways to Wellbeing'. The app records GPS coordinates which populates a detailed Happy Place Asset Map of your area. If you like, you can even share your Happy Places on social media.

Take a Happy Place Challenge

Invite residents to discover Happy Places in their local area to promote health and wellbeing. Take a Happy Place Challenge on your own or with friends or family and discover the treasures in your community. You can monitor improvements in health and wellbeing using validated health metrics.

Benefits of the Happy Place App.

- 1 Empower local people to inform Joint Strategic Asset Mapping**
We support public sector professionals to produce citizen led Joint Strategic Assets Assessments which help ensure finite public sector resources are used wisely.
- 2 Utilise the Happy Place App as a health promotion or community consultation tool.** Empower and activate citizens to discover local places that help them to stay well.
- 3 Re-brand and promote the assets of your community**
All communities are built on strengths. Help people to rediscover and reconnect with these and promote a positive image of your local area.
